

# Heat Box

## Quick and easy insect heat treatment

The innovative Samitech Heat Box solution based on a unique technology: Uses Far Infrared Waves to eliminate pests by dehydration, without damaging treated objects.

Portable and effective heat treatment solution that allows treating any object in hotels, homes and offices.

Heat Box works for bedbugs, worms, moths, termites and other xylophages, mites, fungus... virtually any kind of insects.

## Datasheet

Treatment volume	1m <sup>3</sup> (+5%)	10.7 ft <sup>3</sup> (+5%)
Box dimensions	100 x 100 x 100 cm	(39,3 x 39,3 x 39,3 in)
Box material	High strength thermal reflector - High strenght fierglass	
Number of heating panels	3 per set	
Heating panel material	SAMITECH Heating fabric forced by PVC and fiberglass	
Treatment temperature range	85°C - 95°C (185°F - 203°F)	
Compliance	CE / UL / CSA	
Equipment weight	14.0 Kg	(30.8 Lbs)

Packing	Heavy duty corrugated cardboard
Total weight	14.5 Kg (32.0Lbs)
Dimensions	100 x 40 x 40 cm (39,3x15,7x15,7 in)
Cartons per EU pallet	6 boxes

Power Suply	100-120V ~50Hz
Estimated average power	1500W

Origin country	Spain
Taric Code	8514308000

<b>Heat Box Easy Control Pack content:</b>
Bubble structure
Base
Easy control device
Heating panel x3 (including cords)
Inlet Power cord
Easy transport bag

## Accessories and components

Bubble

Heating panels x3

Easy control device

Power cord

Base

Easy transport bag

## Heat Bubble technology is using the same heating principle of the solar waves

The far infrared radiated heat is 100% safe for objects and as opposed to convection heat there is no waste of energy in heating the air.

The bubble is made of a light and flexible material that acts as thermal reflector and insulator. Six heating panels located in the bubble's internal sides generate the far infrared heat that kills insects by degrading their protein molecules.
