

# Heat Wrap

***Portable and flexible Heat Treatment solution for wood  
;Shape it as you need!***

***SAMITECH is revolutionising the pest control sector by improving classic heat treatments with a new technology based on far infrared waves that penetrate deep into the objects surface killing insects by dehydration.***

***Portable and flexible Heat Treatment solution for wood***

***Totally modular and adaptable set of heating panels:***

***Uses Far Infrared Waves to eliminate pests by dehydration, without damaging the treated objects***

# Heat Wrap

Heat Wrap is the physical solution against xylophages in all stages for any kind of wood:

A modular set of six heating panels, adaptable as needed: beams, floors, walls, ceilings, furniture... regardless of the shape.

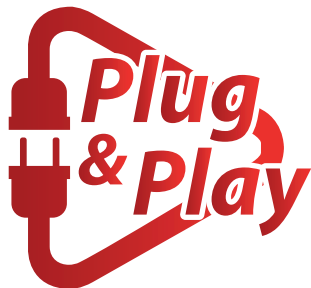

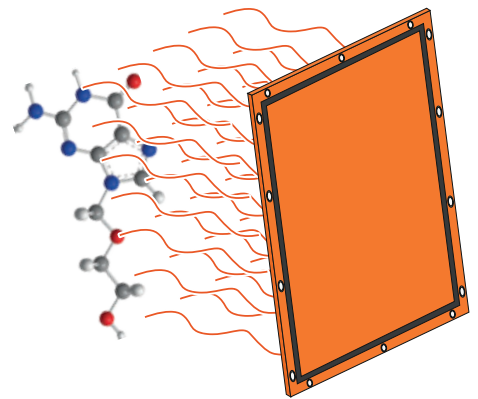

## *Heat Wrap is based in SAMITECH Infrared intelligent heating technology*

The far infrared waves radiated by each panel penetrate the wood surface and directly attack the protein cells of the insects, causing their death by dehydration.

This physical process does not harm treated objects.

A light, flexible and durable nano-technological fabric, designed for industrial use that produce far infrared waves.

Does not require professional operators.

Flexible and adaptable: easily adjust to any object shape.

No chemical usage.

Silent treatment.

- Manage treatment duration and monitors time remaining
- Perfect display screen in any light condition
- No learning curve

- Operation with only two buttons
- Simple and intuitive use
- Works on any household socket
